

Naeem Sabir

Software Engineer • Full-Stack • Mobile • AI Systems

Lahore, Pakistan • naeemsabir002@gmail.com • github.com/naeemsabir1 • naeemsabir.netlify.app

PROFESSIONAL SUMMARY

Independent software engineer with hands-on experience building and shipping production-grade mobile and web applications end-to-end. Published iOS and Android applications, architected SaaS platforms, and implemented AI-powered systems using GPT-4, Whisper, Groq, and ElevenLabs APIs. Strong focus on scalable architecture, performance optimization, monetization strategy, and polished user experiences.

EXPERIENCE

Independent Software Developer — Freelance / Remote 2022 – Present

- Designed, developed, and shipped two production mobile applications including a live iOS App Store release and Android application.
- Built and deployed 5+ commercial web products across SaaS, AI tooling, e-commerce, and creator-focused platforms.
- Integrated OpenAI, Whisper, Groq, and ElevenLabs APIs into real-time AI voice and transcription systems.
- Implemented Stripe and RevenueCat subscription systems with optimized pricing and monetization flows.
- Managed full product lifecycle including architecture, development, deployment, client communication, and iteration.
- Built a portfolio platform using Next.js, GSAP, and Framer Motion with advanced animation systems and AI integration.

Freelance Digital Marketer & Growth Consultant — Remote 2021 – 2022

- Managed digital marketing and growth campaigns for multiple businesses and online brands.
- Applied growth experience to product positioning, monetization, and user acquisition.

SELECTED PROJECTS

Talkio — AI Language Learning App (iOS App Store)

Built an iOS language-learning application that transforms short-form videos into personalized AI lessons using Whisper, GPT-4, and ElevenLabs pipelines. Implemented native iOS Share Extension support, localization, and subscription monetization.

Scribec — AI Study Assistant (Android)

Developed an Android app for screen recording, lecture transcription, flashcard generation, and quiz creation using Whisper AI and MediaProjection APIs.

SopWriter

Built a SaaS platform for AI-generated Statements of Purpose using Next.js, FastAPI, Stripe, and multi-stage LLM refinement pipelines.

CreatubeAI

Developed an automated short-form video generation platform using FFmpeg pipelines, GPU-backed rendering infrastructure, Redis queues, and WebSocket-based progress tracking.

DevHunt

Created an AI-powered job aggregation tool that scrapes developer jobs, scores relevance using LLM systems, and ranks opportunities automatically.

TECHNICAL SKILLS

Mobile	Flutter, Dart, Swift, Kotlin, RevenueCat, App Store Deployment
Frontend	React, Next.js, TypeScript, Tailwind CSS, Framer Motion, GSAP
Backend	Python, FastAPI, Node.js, Express, Firebase, Supabase, Redis
AI / LLM	OpenAI GPT-4, Whisper, Groq API, ElevenLabs, Vector Search, RAG
Infrastructure	Stripe, Bull Queues, WebSockets, FFmpeg, Cloud Deployment
